# SIGNAL ENERGY<sup>®</sup>

## CONSTRUCTORS

April 9, 2019

Packer Township  
2234 Hudson Drive  
Weatherly, PA 18255

Attention: Chairman, Sue Ann Gerhard  
Vice Chairman, Cory Gerhard  
Supervisor, Adam Nyer

**Re.: Letter of Support for Broad Mountain Wind Project**

Signal Energy has been designing and building wind energy projects across the United States and Canada since 2005. Our experience and capabilities extend to every aspect of wind farm construction, including civil infrastructure, wind turbine foundations, electrical collection systems, wind turbine transportation and erection, substations, and transmission lines.

Over the years, we have worked extensively with Liberty Power and know firsthand what goes into building their renewable energy projects. That is why we fully support the Broad Mountain Wind Project in Packer Township. As you can see from their submission, the development plan for Broad Mountain is expansive and comprehensive. That methodical approach from design through construction ensures a superior installation that limits environmental impacts and minimizes the project footprint. That sensitive approach to development is impressive.

The project also promises economic benefits locally. I can tell you that projects like this create spinoff opportunities during the construction phase for a number of companies that support development. Companies like ours always work to source labor and materials locally, meaning much of the investment being made to build Broad Mountain Wind Project will stay local, too.

Wind continues to be the cleanest domestic means we have for powering our economy while improving the environment. Signal Energy has thousands of megawatts of renewable energy projects complete, in operation, and performing above expectations. The Broad Mountain Wind Project fits within the zoning plan devised by Packer Township and, because of the level of commitment Liberty Power put into its design, deserves your support. Thank you.

SINCERELY,

Lance Gopffarth  
Vice President - Wind
